1996-93	4WD T100 Pickup	SINGLE	RS97273	RS5402	RS5573

1. Front shock must be installed rod end down (without shock boot).
2. 1976 ½ - 1986 Blazer or Jimmy and short bed pickups with a 4" suspension system will require a transfer case lowering kit part number RS6631. Some vehicles equipped with 2 ½" suspension system may experience a driveline vibration. Part number RS6631 can be used to possibly correct the vibration, but a driveline vibration may still be present. CAUTION: RANCHO DOES NOT RECOMMEND INSTALLING A 4" SUSPENSION SYSTEM ON VEHICLES EQUIPPED WITH THE "LONG" REAR TAIL SHAFT HOUSING, REAR UNIVERSAL WEAR WILL BE ACCELERATED AND DRIVELINE VIBRATION WILL OCCUR.
4. Check the Shock Application section for the correct shocks used on vehicles which come equipped with OE Quad Suspension or Add on Dual Shock Option.
5. On CJ's with 4 speed transmissions, rear driveline will need to be lengthened, transfer case cross member will need to be lowered from frame ½" and driveline vibration will occur. Use Lowering Bracket Kit to lower transfer case ½". Part No. RS6633 fits 1941-1975. Part No. RS6639 fits 1976-1986.
6. If these vehicles have a Detroit-type driveline, the driveline must be replaced by a Spicer-type driveline.

Rear propeller shaft (Detroit Universal)

Rear propeller shaft (Spicer)

7. On some models a low speed vibration may occur in the front driveline.
8. If tie rod assembly is Diagram 1 - inverted "Y" it must be changed to Diagram 2 later model, 1978-79, inverted "T" style, (see below). CAUTION: SOME VEHICLES WILL BE UNABLE TO CHANGE TO THE INVERTED "T", THEREFORE A DUAL STABILIZER OR A SUSPENSION SYSTEM CANNOT BE INSTALLED. VEHICLES EQUIPPED WITH A POWER STEERING CYLINDER CANNOT BE CONVERTED TO THE INVERTED "T".

9. Rancho highly recommends the use of the constant velocity (Spicer style) front driveshaft, as used in the Jeep factory trailer towing option. The Jeep original equipment, light duty, double offset joint, front driveshaft should not be used if any of the following conditions occur. If you have Select-Track Option. If you drive 55-65 mph for long periods of time. You tow a trailer. You use your vehicle to pull other vehicles out from being stuck. If you use the light duty driveshaft you will experience driveshaft boot wear and will need to re-pack the offset joint periodically and replace the boot periodically.
10. 1987-90 4WD Blazer or Jimmy and short bed pickups with a 4" suspension system will require a transfer case lowering kit part number RS6640. Some vehicles equipped with 2 ½" suspension system may experience a driveline vibration. Part number RS6640 can be used to possibly correct the vibration, but a driveline vibration may still be present. The exhaust cross pipe will need to be modified to clear front drive shaft.
11. RS8701 is required to restore the turning radius, on right turns.
12. If the rear of your vehicle is equipped with a height-sensitive brake proportioning valve, contact your local dealer for correct adjustment procedure of the proportioning valve. CAUTION: VEHICLES WITH NO ADJUSTMENT PROCEDURE, RANCHO DOES NOT RECOMMEND INSTALLATION OF THE ADD-LEAF OR LEV-A LOAD.
13. Block Kit No. RS70054 is required with RS86209 Rear Spring for a 4" lift.
14. Full Size Lev-A-Load Kits will not fit vehicles with factory overload mounted above leaf spring.
15. Vehicles with a 13 ¼" rear driveshaft will require a transfer case lowering kit RS6644.

17. Will not fit vehicles equipped with big block engines, 15" or smaller wheels, or vehicles with anti-lock brakes (ABS).
18. The net raised height achieved with this system is dependent upon the adjustment of the torsion bars prior to installation. Example: If the Rancho System is listed as 3", but the torsion bars on a vehicle are adjusted to 1" over stock, the net raised height will be 2". The net raised height will be 1" less on vehicles equipped with the Z71 Off Road Package.
19. RS968 4" C-Bushing Kit is required to align vehicle.
20. Additional washers may be required to increase space between shocks on lower mount.
21. On 1976-81 CJ5, CJ7, Scrambler 2 ½" Suspension System RS5119 & RS999119 may be too short and you must use RS5113 & RS999113 with Bump Stop Kit No. RS8203.
22. Part No. RS8125 axle shim kit may be required on rear axle for shock-to-axle clearance.
23. I.D. of shock bushing is smaller than mounting pin & requires lubrication & extra effort for installation.
24. Slight grinding of lower control arm is required.
25. Steering arm may contact shock body on RS5113, RS5119, RS999113 & RS999119 on FJ43 & FJ45. Install shock boot towards ground for additional clearance.
26. This Spring is required with the Primary Suspension System, to get the proper lift.
27. Bumpstop must be lowered 2" or damage to shock will occur.
28. Must have factory hole in tie rod for stabilizer.
29. We recommend installing new ball joints when installing Part No. RS6500.
30. Kit RS60612 will work on 1983-86 Nissan but raises rear 2"-3".
31. 1967-72 Chevrolet/GMC Trucks may be equipped with a non-adjustable drag link. In these cases the drag link will need to be replaced with a late model Chevrolet/GMC adjustable link, available through your Chevrolet or GMC dealer.
32. On Blazer/Jimmy with worn or sagging rear springs, vehicle will sit low in rear. Rear Add-A-Leaf part No. RS60812 will correct this.
34. RS996 Rockcrawler Bushing Rebuild Kit is Available (Rebuilds one Link - 4 Kits required for completed vehicle.)
35. Height will vary due to inconsistent factory height.
36. On M38, vehicle spring anchor mounts will need to be drilled out and you must buy Jeep spring anchor bolt Part No. RS384228 (4 per vehicle) to install springs. Available from your Jeep dealer.
37. Remove ½" O.D. x 7/8" I.D. sleeves, if used, from the old spring shackle ends and insert sleeves into the Rancho bushings.
39. Vehicles equipped with GM's Auto Trak system WILL REQUIRE the replacement of the front drive shaft or else severe drive line vibration and noise will occur. Rancho recommends "Powertrain Industries" part number 3194-9800 or equivalent. Available from: Powertrain Industries, Inc. 7532 Anthony Ave. Garden Grove, CA 92841. Toll Free: 1-800-798-4585. Email: sales@powertrainindustries.com.
40. May need longer rear U-bolt Kit RS737. 89-91 standard cab, short bed Toyota requires U-bolt Kit RS745.
43. Will require minor modification to inner fender well.
46. Must have rear mount fuel tank only, no side saddle tanks.
48. RS60612 may be used for this application will lift ¾".
49. This Add-A-Leaf may be too long for some vehicles. The ends of the leaf may be trimmed to help provide a correct fit.
50. May need to reuse stock center pin, check length before disassembly. Add-A-Leaf may need to be drilled for larger stock center pin bolt.

51. Not recommended for XJ Cherokee or Comanche with 3 leaf springs.
59. You must use soft-valved RS5000 shock absorbers listed. Corresponding RS9000XL's must be set on 1 or 2.
60. Not recommended on vehicles without power steering.
61. Rear block kit, Part No. RS73044 may be required. If RS73044 is used, Shock RS5118 will be required.
64. RS1902 adjustable torque rod S-link kit is required.
66. This kit does not fit vehicles which are equipped with factory high rider package (IRH) or vehicles with an aftermarket pitman arm with more than 1 1/4" off-set.
70. RS5600 series shocks are 1 3/8" bore.
79. Our torsion bars are heavy duty to resist sag when adjusted to maximum height. Vehicle may not be raised, and rear Add-A-Leaf may not be needed.
80. Most CJ2A, CJ3A, CJ3B, MB, M38, M38A1 have a sideways U-type shackle which must be upgraded to plate-type shackle. Our shackle kit also includes the urethane bushings for your frame. Since stock bushings are usually worn, our shackle kit Part No. RS6636 is highly recommended (one kit per axle).
81. Front kit Part No. RS726 includes two tie rod ends Part No. RS7600.
83. Jeeps use stock location with no drilling.
84. This kit will not fit vehicles which have a vacuum servo mounted on drivers side of the front axle.
88. Kit includes front and rear U-bolts.
89. Hole drilling or bracket modifications may be required on some vehicles.
91. Kit includes both front and rear U-bolt kits. U-bolts are 3/8", you will have to drill your spring plates.
92. Factory rear springs must have a flat measurement eye to eye of 52". Some heavy duty rear springs measure 56" flat and cannot be replaced.
95. Rancho rear block kit RS82054 may be required for this application.
96. This is a unique 2 leaf Add-A-Leaf system that raises the vehicle approximately 1" - 2", depending upon options.
100. Except dual rear wheels
101. Rancho U-bolt Kit RS722 may be required if dual Add-A-Leaf's are installed on 1980 and newer vehicles.
102. This system is only sold as a complete kit! Individual components will not be sold separately. For warranty of individual components, send component directly to Rancho's Technical Department and a replacement part will be sent out immediately.
107. Kit includes the (2) RS5006 add-on position shocks.
109. For optimum system performance, we strongly recommend that this kit be used in conjunction with Rancho Torsion Bars.
110. RS619 torsion bar kit is required.
112. Dana has no outer lip on the rear cover. Chrysler does have an outer on the rear cover.
114. For use on stock vehicle, use adaptor kit RS6614.
118. For installation of 33" tires use Bump Stop Spacer Kit RS744.
119. For installation of 33" tires use Bump Stop Spacer Kit RS8229.
120. Camber adjustment may not be possible on some raised vehicles. RS6406 coil springs will only work on raised vehicles.
122. Requires O.E. replacement bushings.
123. Most 92-96 fullsize 4WD Bronco and F-150 trucks are equipped with the lower mount of the factory quad shock option, which is needed to mount our RS97489, RS98508, RS5565 & RS5566 steering stabilizer systems.
124. If vehicle has 2 1/2" wide leaf springs, use Bracket Kit RS50616.
125. '87 and newer may only restore stock height.
126. 460 gas with Super Cab or accessories like a winch, etc. Call for application.
128. Sway Bar Mount Spacer Kit No. RS8228 required with automatic transmission.
130. Some earlier model vehicles require newer alignment eccentrics.
131. Height may be taller for non-race prepared vehicles.
132. These leaf springs do not come with bushings. Bushings are in front Kit RS6444.
133. Transfer case Lowering Kit No. RS6641 may be required on some vehicles.
134. Wranglers with "Off-Road Suspension" option (code AWE) will be 1" less. Also, vehicles with a hard top &/or a V-8 may not achieve full raised height.
135. Exhaust modification may be necessary.
139. DO NOT use with composite spring.
140. Use RS6676 Heavy Duty Upper & Lower Link System for improved cornering and overall handling characteristics on stock height vehicles.
142. Front upper and lower link kit, replacement for stock links.
146. Optional Upper Link Kit for added performance and handling.
148. Do not use with after market (stamped steel housing) ball joints. Use only with OE style (forged housing construction) upper ball joints.
149. This unit installs in an auxiliary position and may be used in conjunction with the O.E.M. position stabilizer.
150. This component is optional, and is recommended for optimum performance.
152. This is a spring-seat shock absorber.
153. At this time, this system is NOT approved for installation on the following: vehicles with dual rear wheels, vehicles with a rear drive shaft carrier bearing, or vehicles equipped with a diesel engine.
154. Exhaust modification is required, check local laws regarding exhaust modification prior to installation.
155. Part number RS40054S may be substituted for RS86206 applications. This spring will give a firmer ride and will have limited suspension travel.
156. These springs are not designed for hauling.
161. 95 and later Grand Cherokees (ZJ) front driveshaft replacement. Driveshafts that measure over 24 1/2", No change required. Driveshafts that measure from 20" up to 24 1/2", May require a change. Test drive vehicle, change to Spicer type if a vibration is present. Driveshafts that measure under 20", Must change to a Spicer type. CAUTION: VEHICLES WITH A DRIVESHAFT UNDER 20" MAY STILL EXPERIENCE A VIBRATION EVEN AFTER CHANGING TO A SPICER-TYPE DRIVESHAFT.

162. May substitute Add-A-Leaf RS60611 with 3 leaf rear spring (94-early 96 only).
163. Spring Seat Shock included in front kit.
167. See Shock Absorber Section for Shock Application.
173. 1996 & 1997 Model years REQUIRE 88025-REV. C or later installation instructions.
177. Remove and replace #2 leaf.

182. Has grease fittings.
184. 4 leaf only.
185. Except 4000 lb front axle.
186. Will NOT Fit Vehicles with Rack and Pinion Steering.
187. Will NOT FIT vehicles with OE Pitman Arm YC35-3590-AA. This part number is on the Pitman Arm.
189. Will FIT vehicles with OE Pitman Arm YC35-3590-AA. This part number is on the Pitman Arm.
190. Aft Subframe Braces RS6643 are available for additional support for off-road use.
192. Front Driveshaft vibration may occur in 4 W.D. only. A replacement driveshaft (part no. 3194-1000) is available from: Powertrain Industries, Inc. 7532 Anthony Ave. Garden Grove, CA 92841. Toll Free: 1-800-798-4585. Email: sales@powertrainindustries.com.
197. Ford F150's which have a ("L" - shape bolt pattern for the transmission cross member must use the RS6489 Primary Suspension System; triangular bolt pattern use RS6488 Primary Suspension System.

199. This system cannot be used with any wheel with backspacing that exceeds 4.5" and/or the wheel diameter is less than 16".
200. Steering arm may contact shock body on RS999113 & RS999119 on FJ43 & FJ45. Install shock boot towards ground for additional clearance.
201. On 1976-81 CJ5, CJ7, Scrambler 2 1/2" Suspension System RS999119 may be to short and you must use RS999113 with Bump Stop Kit No. RS8203..
202. Optional Skid Plate can be purchased separately.
203. RS6740 or RS6741 Bracket Kit includes four RS5298 shocks.
205. Ford Superduties are equipped from the factory with either a "tall" (3.7") rear block or a "short" (1.9") rear block. Rancho offers three different choices to accommodate this option.
1. RS44154: Soft ride rear leaf spring is designed to add up to 1" of rear height.
  2. R80053: Rear block kit adds 2 1/2" to rear height on vehicles equipped with the O.E. "short" block and 1" to vehicles equipped with O.E. "tall" block.
  3. RS60642: Rear add-a-leaf kit is designed to add up to 2" of rear height.
206. Installation of this suspension system on 99 and later vehicle equipped with full-time 4WD (A4WD) may provide a slightly more noticeable level of driveline vibration. To offset any driveline vibration, replacement front driveshaft (part number 3191-1001) is available from: Powertrain Industries, Inc. 7532 Anthony Ave. Garden Grove, CA 92841. Toll Free: 1-800-798-4585. Email: sales@powertrainindustries.com.
207. Springs are not included with this system and must be ordered separately.
208. This system does not allow the reuse of O.E. factory 15" wheels.
209. New upper ball joints are not included with this suspension kit but are required to complete the installation, reference instruction sheet for complete listing.
210. Some vehicles may experience a rear driveshaft vibration. A replacement rear double-cardan driveshaft for Rubicons only (part number 3394-0100) is available from: Powertrain Industries, Inc. 7532 Anthony Ave. Garden Grove, CA 92841. Toll Free: 1-800-798-4585. Email: sales@powertrainindustries.com.
211. RS40054S may be used as a HD replacement.
212. Adjustable height coil-over unit.
213. Does not work on vehicles equipped with OE radiator skin plate.
214. Does NOT fit vehicles equipped with the Off-Road Suspension package.
220. Carrier bearing spacer P/N RS6608 is required on vehicles equipped with rear drive shaft carrier bearing. Vehicle may exhibit minimal driveline vibration in 4WD.
221. Optional front skid plate (RS8716B) and differential skid plate (RS6201) can be purchased separately.
222. Shocks sold separately.
223. Optional front skid plate (RS8721B) and differential skid plate (RS6203) can be purchased separately.
250. Front driveshaft required, (2DR: Front: P/N 3194-1925 Rear: P/N 3194-0725), (4DR: Front: P/N 3194-1925 Rear: P/N 3194-2750). Powertrain Industries, Inc. 7532 Anthony Ave. Garden Grove, CA 92841. Toll Free: 1-800-798-4585. Email: sales@powertrainindustries.com.
251. Front swaybar endlink kit REQUIRED.
252. Requires Rancho's cat-back exhaust system - (4 door models require P/N RS720001\*) (2 door models require P/N RS720002\*).
253. Long Arm Suspension.
254. Rear kit, required to level the rear to the front height.
255. Optional quick-disconnect front endlink kit can be purchased separately.
256. Interference with the catalytic converter may prevent installation on 2008 Super Duty vehicles with the 6.8L V10 engine.
- A3. New Part Number Available Third Quarter
- A4. New Part Number Available Fourth Quarter
- PS. Rancho RS9000X Pro-Series shock absorber.
- Q2. Qty. Req. 2
- Q4. Qty. Req. 4
- QL. **quickLIFT** — Additional hardware may be required to level rear.
- XL. Designates XL shock absorber.
- New Part Number, Check availability before placing order.
  - ⊗ Installation of this system does not allow the re-use of OE (factory) wheels.
