

## DEFENDER™ SPYDER SIDE INSERTS

Thank you for purchasing Poison Spyder products for your Jeep. Installation is fairly simple with the right tools and good mechanical abilities. If you are not confident in your mechanical skills, please seek the help of a professional to perform the installation. Please read through these entire instructions before proceeding with installation.

**IMPORTANT:** Completely install and remove these items prior to painting or powder coating. This will allow you to check for fitment or do any clearancing or fitting ahead of time, to reduce the chance of damage to the finish during final installation. Poison Spyder Customs Inc. is not responsible for costs for or damage to paint or powder coat finish under any circumstances, including paint or powder coat of incorrectly shipped or defective parts.

### **PARTS LIST**

- (2) DeFender™ Spyder Side Inserts

### **INSTALLATION NOTES**

- Fully install DeFenders™ on to the Jeep before installing the Spyder Side Inserts.
- Spyder Side Inserts may be installed WITH the solid inserts that come with the DeFenders, or by themselves.
- If installing WITH the solid inserts, sandwich the Spyder Side Insert between the DeFender™ and the solid insert. The solid insert may be painted a contrasting color for a nice accent.
- Spyder Side Inserts may be installed by themselves to allow for improved airflow through the engine bay. In this case they may be installed against either the outside or inside surface of the DeFender™. In either case, you will need to source (14) 5/16-18 nylon insert lock nuts from your local hardware store, and re-use the button head cap screws that came with the DeFenders.
