OFF-ROAD PERFORMANCE EXHAUST SYSTEM

2008-2014 Suzuki **RMZ-450**

219202D320

STAINLESS STEEL SLIP-ON RS4 WITH ALUMINUM SLEEVE

THIS PRODUCT IS DESIGNED FOR USE IN CLOSED COURSE RACING AND IS NOT INTENDED FOR ANY OTHER USE.

CAUTION: The muffler packing on this system MUST be replaced every 6-8 hours of use, or after each moto. Failure to follow recommended muffler re-packing interval can cause muffler damage and may void the warranty.

Caution: Exhaust system may be extremely hot. Let motorcycle cool

down before beginning installation.

Note: Read through all instructions before beginning installation.

Tools Needed:

Metric Socket Set Ratchet Wrench and Extension Torque Wrench Spring Puller Tool

Installation Steps:

- 1 Stock Exhaust Removal
 - a. Remove right rear number plate (see Fig. 1 for fastener locations).
 - b. Loosen stock muffler clamp.
 - c. Remove stock muffler (see Fig. 2 for fastener locations).

2 Install Yoshimura Exhaust

- a. Slide supplied tailpipe clamp over Yoshimura tailpipe.
- b. Install supplied rubber grommet into aluminum muffler mounting bracket. Install aluminum insert into rubber grommet (make sure shoulder of aluminum insert faces toward the frame, see Fig. 4).
- c. Install Yoshimura tailpipe and muffler onto stock header.
- d. Install supplied muffler mount bolt and supplied washer. Install stock chassis mount bolt. Leave loose.
- e. Check exhaust for proper position and clearance and adjust if necessary.

Fig. 1

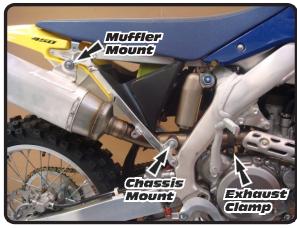

Fig. 2

Fig. 5

- f. Torque chassis mount bolt and muffler mount bolt to 2.5 kg-m (18 lb-ft).
- g. Torque muffler clamp to 2.5 kg-m (18 lb-ft).
- h. It is recommended that the muffler and tailpipe be wiped down with rubbing alcohol to remove oil and fingerprints. This will help prevent tarnishing of the finish after the exhaust is heated up.
- i. Trim the tail plastic as shown in figure 5. The dotted line in figure 5 shows where the plastic must be cut.

NOTE: Your Yoshimura exhaust system has been designed with weight centralization in mind. Trimming of the number plate is required in order to move the muffler as far forward as possible.

j. Apply the adhesive foil heatshield to the inside of the number plate as shown in figure 6. The adhesive foil heatshield will prevent the numberplate from discoloring and / or melting from the heat coming from the tailpipe and muffler.

3 Reinsttall

a. Reinstall number plate.

Before starting motorcycle, check for proper clearance between new exhaust system and rear suspension (i.e. tire, swingarm, brake, rear shock, etc). If any problem is found, please carefully follow through the installation steps again. If problem still persists, please call Yoshimura tech department at (800) 634-9166 / in CA (909) 628-4722.

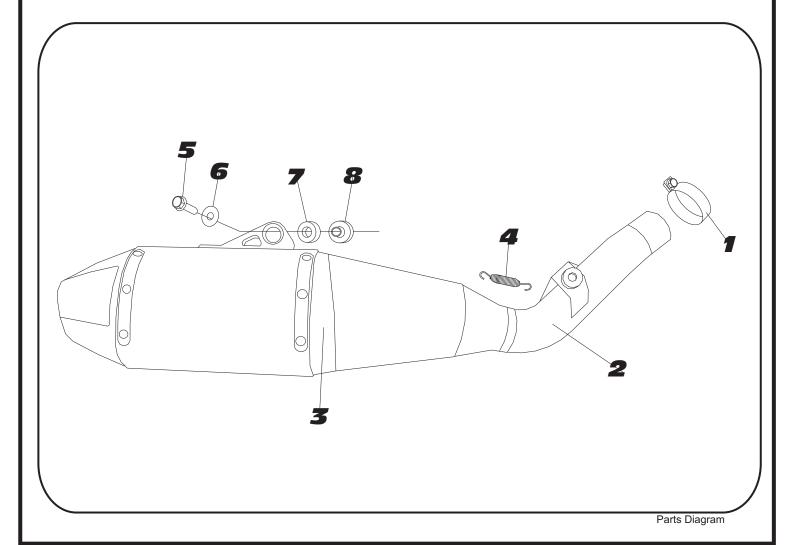

NOTE: After starting motorcycle, it is normal for new exhaust system and muffler to emit smoke until oil residue burns off.

- 1 Using a 4mm Allen key, remove the bolt that secures the aluminum ring and sound insert to the muffler (see Parts Diagram for location).
- 2 Remove the sound insert from the muffler.
- 3 Inspect the sound insert for cracks or damage and replace if necessary.
- 4 Re-install sound insert and aluminum ring. Torque the sound insert securing bolt to 1.0 kg-m (7.3 lb-ft). NOTE: It is recommended that a low strength "Loc-tite" is used on the sound insert securing bolt.
