

Instructions: UTV Windshield

⚠️ WARNING

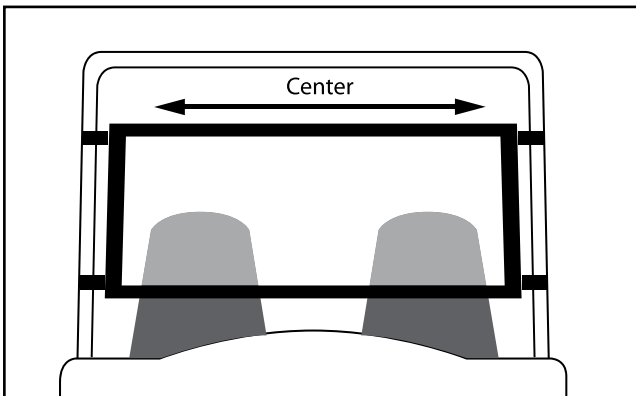

Make sure your field of view is not obscured after mounting your Windshield to your UTV roll cage.

⚠️ CAUTION

Be sure your Windshield is strapped securely and tightly to your UTV roll cage.

INSTALLATION

Attach the top straps to the roll cage uprights first then attach the bottom straps.

Working with the top straps first, tighten or loosen the straps to position the Windshield in the center of the roll cage uprights. Once it is centered and level, tighten all straps down.

CLEANING

Don't clean the clear plastic of your Windshield when it is dry—you can scratch it. The best way to clean the clear plastic is to hose it with water and rub it with your bare hands. Liquid soap may be used.

During freezing weather an automotive windshield solvent and a soft cloth will work (don't use your bare hands with the solvent).

Clean the fabric areas of your Windshield with a soft brush and warm water. **DO NOT USE SOAP** as it can damage the protective coatings on the fabric. Air dry.

STORAGE

To avoid mildew be sure that your Windshield is completely dry before you store it for an extended period in an enclosed area.

WARRANTY

Your Windshield is factory warranted for workmanship and materials for two years after purchase.
